

## Google Classroom Information

**Google Classroom** is an online blended learning platform developed by Google for schools that aims to simplify online and remote learning. Teachers can run a class online, create curriculums, view class announcements, access posted course content, view posted assignments, and turn in completed work. The platform simplifies teacher-student collaboration.

**BRC** has the capacity through Google Classroom to offer immediate remote learning education. This online tool will be consistently used across the school in order to allow interaction, assessment and feedback.

In order to continuously improve its capacity to offer remote learning, BRC has made a pledge to deliver the best quality online learning that:

- offers unprecedented opportunities for students who would otherwise have limited access to education
- uses a curriculum sequence that allows access to high-quality online and offline resources and teaching videos and that is linked to the school's curriculum expectations
- gives access to high quality remote education resources
- sets assignments so that pupils have meaningful and ambitious work each day in a number of different subjects
- offers a programme that is of equivalent length to the core teaching pupils would receive in school, ideally including daily contact with teachers
- Recognises that younger pupils and some pupils with SEND may not be able to access remote education without adult support and so schools should work with families to deliver a broad and ambitious curriculum.

### **Students will benefit from BRC remote learning:**

- Students won't forget their homework materials. ...
- Interacting virtually could help those students with social anxiety.
- Students who work have more flexible scheduling opportunities.
- Distance learning helps students stay healthy and keep others safe.
- Allows for self-paced learning.
